Note: (1) The base for the index is December 2005. If the index increases, then the real effective rate has depreciated and vice versa.

An increase in the real effective rate index is a real depreciation which is expected to make Zambian tradable goods more competitive on world markets, while a decline in the RER implies a real appreciation which is expected to make Zambian tradable goods less competitive.

(2) Starting with Volume 23 Issue No. 25 the REER will be published with a two-month lag
